Asteroids

Description

Asteroids is a multidirectional shooting game based on a space theme released in November, 1979. The player controls a triangular shaped spaceship, and the object of the game is to shoot and destroy the asteroids coming from all directions in the field and avoid collision at the same time. Each asteroid destroyed will bring the score up by 1, and each round is 60 seconds.

The original version ASTEROIDS game released in 1979

To enter the high score board, player needs to destroy as much asteroids as he can during the 60 seconds.

Installation Instruction

Download the compressed file and decompress it. Open Eclipse and click the File button at the top left corner. Choose open project from file system and find the file folder decompressed from the compress file. Right click the Project imported and click Run As. Click the 1 Java Application option and choose
Main – application then click OK.

Features
